Subject: C8 sampling/analysis

Jim:

I met with AndyR today (4/8/03) and reviewed the latest Adirondack Air proposal for air sampling/testing (that you annotated for AndyR's attention) for C-8. He reviewed task #1 --"A"and "B" and wanted elements of both paragraphs. He did feel however the costs to perform these tasks was too high. Thus he suggested that I do some more research to find a different method /technique or company to collect and analyze for C-8 acid. Thus some additional delay will occur while I pursue this approach.
